

## Cost-effective solutions delivered with minimum risk

The airport industry has never been more challenging. Every investment decision must demonstrate clear value add in terms of benefit to service and safety levels as well as effective management of cost and risk. This applies not just for the initial investment but right through the life cycle of the asset. Safety approvals are also a key consideration for airport operators.

NATS Services has provided engineering services to some of the world's most demanding airport environments for over 40 years. With an enviable track record in safety, we can deliver cost-effective solutions for all of your needs, from removing the risk associated with major capital projects to supporting regulatory compliance and providing through-life support.

### Ahead of schedule and under budget

When Newcastle International Airport decided to develop a new control tower, they formed a strategic partnership with NATS Services. Through a process of independent cost reviews and key performance milestones, we were able to de-risk the assurance and transition process, enabling the tower to be brought into operational service ahead of time and under budget.

## Capabilities

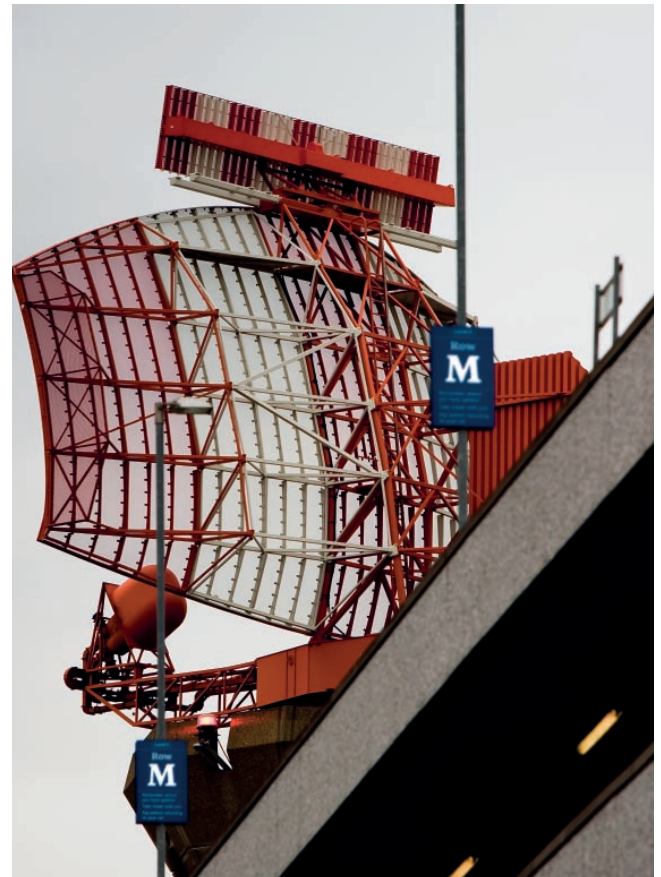

- Project management
- Bespoke system design and procurement
- Safety management / safety case
- Turnkey solutions
- Supplier independence
- Through-life support
- Installation and commissioning

## Benefits

- Low risk
- Tailor-made, cost-effective solutions
- Safety assurance
- Standard compliance

## Expertise

- Asset Management Solutions
  - Communication Systems
  - Surveillance
  - Navigational Aids
  - Airfield Ground Lighting
- System Integration
- Virtual Control Facilities
